

Paediatric Integrated Care

Realising the potential of partnership

This one day simulation-based course focuses on building the knowledge, skills and confidence of health professionals working across different settings, strengthening team working within the Children and Young People's Health Partnership (CYPHP) new model of integrated care.

The course aims to:

- enhance your knowledge and skills in managing children and young people with long-term conditions (specifically asthma, epilepsy, anxiety and depression) to provide safe, high quality, patient-centred care.
- give you an understanding of the role of compassionate human factors in healthcare in improving multi-disciplinary teamwork, patient safety and the patient experience.

This course is open to all health professionals working with children and young people with long term conditions in community and hospital setting.
